R E: Grewal –Walker water way.

Sir:

I know you are not finished grading the water way yet, But the grade is not right .

As I'm looking out after the rain this morning we have water standing from The telephone box to the property line, It's from several inches to standing water in others ,this will have to be corrected as we had no standing water before the drainage improvements where made in Grewal's portion of the water way.

We will not accept any standing water as we had none before it was dug up to improve it.

When the grade has been corrected and ready to seed the seed should come From Don Meter Landscaping to match what he used in our lawn when he put it in. As we want the grass to match. There are also bare spots where the Bob Cat turned and tore out the grass, These spots will also need to be repaired.

Thank you very much I know you will take care of these items.

Sincerely

LeRoy Warncke
