DURABILT, INC.
P.O. BOX 20955
CANTON, OH 44701

PHONE (330) 453-9790
FAX (330) 453-7743

Dear Customer:

Enclosed are your drawings as per your contract with Durabilt, Inc. Please look them over. If you have any questions or concerns please contact our production department at the above phone number:

Step 1

Please take these prints to your local building department for approval. (If a permit is needed.) Every building department has their own codes above and beyond state codes. It is important that we know of any changes the building department makes before the material is shipped. If a print is changed by you or the building department changes will be an up-charge afterward. Make sure your building department looks at the prints and signs off.

Step 2

As your salesman mentioned when he sold you the building, you need to obtain permit in Your Name. This will eliminate confusion and will save any extra charges that you will pay if Durabilt, Inc., needs to obtain the permit. If Durabilt, Inc. to obtain permit, it will be an up-charge. All zoning and planning are the customer's responsibility.

NOTE: Additional material required by your local building department may increase in the material component and/or component of the contract price; therefore, a change order must be written before materials are shipped. (Usually the permit send in is adequate, but some building department requirements change when inspectors change.)

Step 3

Install four corners stakes where you wish your building to be located. Notify Power and Gas Companies, so we do not cut these lines when we drill the holes. As per our contract, it is the customer's responsibility to know of any underground and any cost to repair lines will also be customer's responsibility.

NOTE: Modifications made at your request may result in additional costs to you and changes made after delivery of materials will require an additional delivery charge.

Step 4

IMPORTANT

You must sign and return this letter to Durabilt before anything else can be done on your contract. Delay by you will delay completion of your building.

Sign: _____ & Date: _____

Prints okay by building dept. myself

Please check one of the following below:

Received Permit using your drawings _____ Building Dept. signed off on prints _____

Permit not needed _____ Yes _____ Yes _____

** If Building is sold as a non-permit job and later requires a permit for any reason the owner is responsible for extra cost.**

** Last payment must be paid in full and the check made out to DURABILT INC., OR THE BUILDING WILL BE UNDER WARRANTY because our Inspectors must approve the building to our satisfaction in order to Warrant it.

ANY CHANGES TO THE ORIGINAL CONTRACT WILL RESULT IN A TIMELY DELAY.

- NOTES**
- 1) This truss has been designed for the wind loads generated by 80 mph winds at 25 ft above ground level, using 7.0 psf top chord dead load and 10.0 psf bottom chord dead load, 100 mi from hurricane oceanline, on an occupancy category I, condition I enclosed building, of dimensions 45 ft by 24 ft with exposure C ASCE 7-93 per BOCA/ANSI95 If end verticals or cantilevers exist, they are exposed to wind. If porches exist, they are not exposed to wind. The lumber DOL increase is 1.33, and the plate grip increase is 1.33
 - 2) Unbalanced snow loads have been considered for this design.
 - 3) All plates are M20 plates unless otherwise indicated.
 - 4) Provide mechanical connection (by others) of truss to bearing plate capable of withstanding 146 lb uplift at joint 2 and 146 lb uplift at joint 8.
 - 5) This truss has been designed with ANSI/TPI 1-1995 criteria.

LOAD CASE(S) Standard
