17296 Permit Number
(1730)

the 1990s, the number of people aged 65 and over in the United States is projected to increase from 20 million to 35 million (U.S. Census Bureau 1996).

As the number of people aged 65 and over increases, the number of people aged 75 and over is also expected to increase. The number of people aged 75 and over in the United States is projected to increase from 10 million in 1990 to 15 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 75 and over increases, the number of people aged 85 and over is also expected to increase. The number of people aged 85 and over in the United States is projected to increase from 3 million in 1990 to 5 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 85 and over increases, the number of people aged 95 and over is also expected to increase. The number of people aged 95 and over in the United States is projected to increase from 1 million in 1990 to 2 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 95 and over increases, the number of people aged 100 and over is also expected to increase. The number of people aged 100 and over in the United States is projected to increase from 0.5 million in 1990 to 1 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 100 and over increases, the number of people aged 105 and over is also expected to increase. The number of people aged 105 and over in the United States is projected to increase from 0.2 million in 1990 to 0.5 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 105 and over increases, the number of people aged 110 and over is also expected to increase. The number of people aged 110 and over in the United States is projected to increase from 0.1 million in 1990 to 0.2 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 110 and over increases, the number of people aged 115 and over is also expected to increase. The number of people aged 115 and over in the United States is projected to increase from 0.05 million in 1990 to 0.1 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 115 and over increases, the number of people aged 120 and over is also expected to increase. The number of people aged 120 and over in the United States is projected to increase from 0.02 million in 1990 to 0.05 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 120 and over increases, the number of people aged 125 and over is also expected to increase. The number of people aged 125 and over in the United States is projected to increase from 0.01 million in 1990 to 0.02 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 125 and over increases, the number of people aged 130 and over is also expected to increase. The number of people aged 130 and over in the United States is projected to increase from 0.005 million in 1990 to 0.01 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 130 and over increases, the number of people aged 135 and over is also expected to increase. The number of people aged 135 and over in the United States is projected to increase from 0.002 million in 1990 to 0.005 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 135 and over increases, the number of people aged 140 and over is also expected to increase. The number of people aged 140 and over in the United States is projected to increase from 0.001 million in 1990 to 0.002 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 140 and over increases, the number of people aged 145 and over is also expected to increase. The number of people aged 145 and over in the United States is projected to increase from 0.0005 million in 1990 to 0.001 million in 2000 (U.S. Census Bureau 1996).

As the number of people aged 145 and over increases, the number of people aged 150 and over is also expected to increase. The number of people aged 150 and over in the United States is projected to increase from 0.0002 million in 1990 to 0.0005 million in 2000 (U.S. Census Bureau 1996).
