I completed the final inspection with Laura Hibbard pertaining to the special use permit/well within the city limits on Tuesday, March 23, 2021 at 11:30AM. The plumbing appurtenance that connected the well to the water system had all been removed, the well lines were cut and capped, and the pressure tank had also been removed. She was able to show where the well casing is located. The location is demonstrated on the attached map. At this time, I see no further action needed regarding the water system.
