Re: Napco Plastics
600 Filmore St.
Napoleon, Ohio

Gentlemen:

Our company has been awarded a contract to install automatic sprinkler protection in the above property. We will require a 6" underground supply from the 6" city main in Filmore St.

We believe we are to supply all the material for the tap and the City Water Department is to make this tap for a fee. Please advise what our cost would be for this tap and what type of tapping machine you have so that we can order the correct valve.

We would also like to know how far the 6" city main is from the North edge of Filmore Street.

We would appreciate your answer to the above questions, at your earliest convenience.

Yours very truly,

THE FYR-FYTER COMPANY
Globe Automatic Sprinkler Dept.

Check with
Baker.
see if he gave
them \$50.00 price

Re: Napco Plastics
Napoleon, Ohio

Gentlemen:

Thank you for your letter of Jan. 29, 1962 in regards to water supply for the above.

The cost of the tap has taken us by surprise. The \$250.00 cost is \$200.00 more than was quoted to us by Mr. Baker before we quoted this installation. We had to compete for this work and it required us to quote a highly competitive price. The \$200.00 more required for this work would take a large part of our estimated profit on the entire sprinkler installation.

We are asking you if you will stand by Mr. Baker's quote of \$50.00 as we have no recourse but to ask the owner for an extra \$200.00 and I am sure he will be most unhappy!

For the record, the following is the material and labor we are to furnish.

- #1. - 42'-0" of 6" Mechanical Joint Pipe
- #2. - 1 - 6" Post Indicator & Valve
- #3. - 1 - 6" Tapping Valve & Sleeve
- #4. - All excavation, backfill and repaving.

The following is work to be done by the city.

- #1. The tapping of 6" main in Fillmore St.

We thank you in advance for your consideration of our position in the above

City of Napoleon
