## CERTIFICATION FORM

This form should be completed by a professional surveyor and returned to the local flood plain administrator. The form can be used to serve two purposes. First, it can be used by the property owner to certify that the completed construction meets the flood elevation standards of the community. Secondly, this form can be used by insurance agents to complete the Elevation Certificate which they need to complete for insuring new construction in the flood plain. The community should keep the completed original on file and provide the property owner with a copy that he or she can furnish to the insurance agent. In this manner the agent will not have to call upon community officials for assistance in determining the elevation data they require.

NOTE: The National Flood Insurance Rate map, panel no. 390266 0005 C, dated March 4, 1985, for the City of Napoleon, Ohio, indicates the area of Lot 20 of the Original Plat to be in zone "B", (NGVD). Flood plain elevation is 657.5 ± feet.

I, the undersigned, do hereby certify to the following elevation at the referenced property in compliance with the permit requirements of the Flood Damage Prevention Ordinance (Resolution) of \_\_\_\_\_.

Location of property	<u>404 East Front Street</u>	
Owner of property	<u>City of Napoleon</u>	
Lowest floor elevation including basement	<u>Spike in telephone pole in south side of alley</u>	feet above
	<u>654.90</u>	msl.
		(mean sea level)

Professional seal

Paul J. Wetherman
