Ridgeville Corners, Ohio

Subject: Violation of Ordinance No. 404, Building Code

Dear Mrs. Elarton:

On December 20, 1960 I made an inspection of the building at 222 W. Front Street which is being altered for use by the Napoleon Spring Works. The new work being done by the electrical contractor conforms to our building code but the existing asbestos insulated conductors in the ceiling are not safe. The use of this type of conductor is prohibited in a business location by the National Electrical Code which is a part of Ordinance No. 404. The recommended method is to use a rigid metal conduit as a carrier for all conductors.

If there are any questions you may have concerning our new building code we would be happy to answer them.

Thank you.

Very truly yours,
CITY OF NAPOLEON
