Question: Should this be allowed?  
Asphalt parking along the Street

ROF  
4-14-88  
1/2

at American Legion Bert G Taylor Post 300  
at 500 Glenwood Ave

PB Zoning district

Parking not permitted in green belt  
access drives limited to 30'

Variance to Parking requirements of 20' green  
belt

Stone is by use before code should have  
variance for Stone

perment parking should have a variance

76.05 Parking near curb can only be done  
by ordinance

### Conclusions \_\_\_\_\_

- ① the conditional use permit was granted by use before the code
- ② the zoning was listed wrong on the permit the building was extended without a renewed conditional use permit and it is now late to deny extension
- ③ a variance would be required for not having off street parking but this has also existed already for some time
- ④ Stone parking has already existed and will only be

improved to asphalt parking

ROF

4-14-88

Sheet No 2/2

- ⑤ I would give this fact the most weight.— when Glenwood Ave was improved that entire area was given a drop curb section and for that fact I would allow that entire area to be paved with nothing more considerations than for grade check by the engineering. Its not the same as if a new parking area was being established. Especially since there is no regulation about how soon a stone parking area needs to be paved with asphalt after it has been established
