**APPLICATION FOR PERMIT TO MAKE INSTALLATION  
AND/OR  
WORK ALONG OR ACROSS ROADS OR STREETS**

<b>TO:</b> City of Napoleon	<b>DATE</b> 05/28/15	<b>REFERENCE</b> E.755702
-----------------------------	----------------------	---------------------------

Application is hereby made by United Telephone Company of Ohio- DBA CenturyLink

TO PLACE fiber optic cable starting on CR 12 approx. 272' south of Independence Dr. (approx. 78' north of railway tracks) from a handhole in the east R/W boring under the road to the west R/W and going north for approx. 248' placing a new handhole by the power pole, then boring under Independence Dr. for approx. 155' onto customer property and then on into Best Western.

**WE AGREE TO THE FOLLOWING CONDITIONS UPON ISSUANCE OF THE PERMIT:**

1. To restore all disturbed surfaces to their original condition and adhere to the specifications or restrictions as outlined below.
2. To keep the disturbance to road surface and shoulders at a minimum. Trenches within the road and shoulder areas will be backfilled with gravel and tamped, so that settlement of the material is minimized. If settlement does occur within one year of backfilling, additional suitable material will be put into place and compacted.
3. All road crossings where said road is hard-surfaced (blacktop, concrete, chip & seal, etc.) will be made using the bore method unless further permission is granted from the governing authority regarding cutting the pavement. If an open cut is permitted, the road surface at the trench will be replaced with material of the type that was removed and the new surface will conform with the grade of the undisturbed surface.
4. Traffic will be maintained at all times, unless permission is granted by the governing authority to close the road. Any necessary lights, signs, barricades, and/or flagmen and watchmen will be placed on the job for the protection of traffic at all times, day and night, during the time this work is being done and that instructions given by the governing authority as to handling of traffic will be fully complied with.
5. All mailboxes, signs, yards, driveways, drainage structures, fences, ditches, sidewalks, or other pertinent property damaged or removed during initial construction or future maintenance will be replaced or repaired as good as or better than existing.
6. To notify all property owners within the construction area at least two (2) working days before work begins.
7. Any drainage tiles encountered will be repaired or replaced.
8. With minor exceptions, the proposed cable will be placed within the confines of public right-of-way at an approximate depth of 36 inches, Work according to attached prints. (If for any reason the cable cannot be buried at the minimum depth of 36 inches approval must be obtained by the proper authority).
9. Where possible, pedestals will be located in the existing fence line or apparent right-of-way with all loops to such equipment always maintaining 36-inch depth under existing ditch lines. It is proposed to bury the cable in a trench around the end of drainage structures at a depth of least 36 inches. Terrain and soil conditions may not permit exact locations and depths as indicated above. For specific detail of this project, please refer to the attached plans. (If for any reason the cable cannot be buried at the minimum depth of 48 inches approval must be obtained by the proper authority).

**SCANNED**

10. To assume the responsibility for and to save the governing authority, as signed below, harmless from any and all claims arising from the work performed, for personal injuries and property damages due to the direct sole negligence of the applicant, and to defend any action arising there from.
11. If, in the future, improvements or relocations are made to any of the above portions of roads, it will be the financial responsibility of the applicant or successors to move or relocate such installations at the request of the governing authority.
12. To notify all utilities in the right-of-way two (2) working days prior to construction by calling the Ohio Utilities Protection Service at 1-800-362-2764 for notification of member utilities. Non-members must be called directly.
13. To notify the governing authority at least two (2) working days before starting construction.
14. The undersigned Governing Authority will not be held liable for damage to the Company's facilities covered by this permit unless such damage is due to the negligence of this Governing Authority.

Enclosed with the 2 copies of this application are 2 sets of prints of the project proposed herein. It is requested that, upon your approval, one copy of this application be returned to this office with the necessary signatures (if any changes are desired, please mark one set of prints and return for further processing). Please contact this office at 740-383-6864 (collect) if you have any questions.
