(1)

The following table shows the results of the experiments conducted during the course of the investigation. The data are presented in the form of a table, with the first column representing the concentration of the reactants and the second column representing the rate of reaction. The values are given in units of moles per liter per second.

The results show that the rate of reaction increases with increasing concentration of the reactants, and that the reaction is first order with respect to the concentration of the reactants.
