

This tap will stop at the new shutoff valve at the City's water main on the east side of Industrial Drive. Vision Molded Plastics will need to have a contractor bring the pipe across Industrial Drive and into your buildings per the City of Napoleon's rules and regulations.

Marc Gerken has given his permission for you to open cut Industrial Drive and you will need to contact Brent Damman, the Building and Zoning Administrator, for the fees required for open cutting the road. Further, Sonny Helberg the Construction Inspector, will need to be contacted before the project is started to inspect the construction work in the roadway. Your Contractor will be required to do all restoration to the excavation, pavement and road bed. He will also be required to set up proper traffic control (detours, barricades, signage) and inform the media, Operations Department, Fire Department and Police Department as to the date and times when such work is being performed.

Should you require any further information on this matter, please feel free to contact my office at 599-1891, Monday through Friday from 8:00 a.m. to 4:00 p.m.

Sincerely,

Jeffrey C. Marihugh
Operations Superintendent

cc: Marc S. Gerken, Acting City Manager
Charles L. Heinze Jr., Water Distribution Foreman
