Re: Electrical inspection 225 E. Main

Dear Mrs. Warner:

An electrical inspection was done at the request of John Fruchey, Fire Inspector, on October 12, 1981 at a rental property owned by you at 225 E. Main.

The following is a list of items found needing immediate repair:

- 1. The electric meter at the rear of the house is only 60 amp service and should be raised to 100 amp service.
- 2. The electric meter is not fastened to the building.
- 3. The main disconnect box below the meter is loose and locked. A new hundred amp box shall be installed and fastened to the wall and box shall not be locked.
- 4. Main disconnect has no ground and no second ground to cold water pipe ahead of the water meter.
- 5. There are numerous open splices in the basement and the wiring is old and shall be replaced. Splices shall be made in boxes.
- 6. Basement lights have open connections. Lights shall be replaced with new and shall be attached to metal boxes.
- 7. All basement wiring shall be stapled to the under side of floor joists.
- 8. Dryer receptical in basement is loose from wall.

anno

Mrs. Warner October 13, 1981 Page 2

- 9. Range receptical in kitchen is loose from wall and has open splice in basement.
- 10. One receptical in kitchen. This receptical is used for refrigerator and toaster and light on extension cord.
- 11. Kitchen ceiling light not working.
- 12. Recepticals in dining room, living room are broken, not working or shorting out.
- 13. Lights in second floor shall not be on extension cords and lights are in faulty condition.
- 14. Wall switches in entire house are faulty.

The entire house shall be rewired to meet regulations of the National Electric Code. This situation shall be corrected within fifteen days of this notice or the electric service shall be discontinued.

Your cooperation and correction of this matter is appreciated.

Yours truly,

Richard G. Hayman

Building Commissioner

Richard & Hayman
