UTILITIES LOCATIONS

Existing Utilities

17.8 While the plans indicate the location of the existing facilities in accordance with the best information presently available neither the OWNER nor the ENGINEER assumes any responsibility for the accuracy of their location or that all utilities are shown. Existing utilities and obstructions along the route of the project shall be located and their elevations determined at least 400 feet in advance of all pipe laying. The Contractor or his agents shall be responsible for contacting the utility's companies which have services in the area, 48 hours prior to any work being done in that area. The utility companies shall stake the exact locations of their utilities to the best of their knowledge. In the event that an unknown utility service line is discovered the Contractor will stop work and contact the appropriate utility company to then have the location of the line determined. In all phases of the project the CONTRACTOR shall work in close contact with all utility companies servicing area. The utility companies to contact for this project are follows:
