Gentlemen:

The Ohio Environmental Protection Agency has reviewed the plans submitted pursuant to Ohio Revised Code Sections 6111.44 et seq. These plans are approved subject to the condition of compliance with all applicable laws, rules, regulations and standards. Further, all construction must be supervised by a registered engineer, if required by law, or expert qualified in such work.

This approval shall apply only to those facilities shown on the plans cited above.

That this approval shall become void August 1, 1979, unless the facilities shall be constructed as proposed by that time.

Roof drains, foundation drains and other clean water connections to the sanitary sewers shall be prohibited in accordance with legally adopted rules regulating the use of sanitary sewers.

Sewer and manhole construction and joints shall conform to standards of this department.

The proposed facility may be constructed only in accordance with plans approved by the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express written approval of the Agency. Any deviation from the approved plans or the above conditions may lead to denial of a discharge permit or other sanctions and penalties provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities prove to be inadequate or cannot meet applicable standards.

Should there be any questions regarding the requirements, meaning or interpretations of any of the above which we may clarify, please contact the appropriate District Office of the Ohio Environmental Protection Agency.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Board of Review pursuant to Section 3745.04 of
