GENERAL NOTES
 All plates shown are 24 gauge ALS plates unless otherwise noted. Plates to be applied on both faces of each joint and centered unless plate position is dimensioned.
 Provide continuous lateral bracing to bottom chord at maximum intervals of 10'-0" or design is based substantially on current applicable standards of P.I. and N.D.R. at the time of drawing.
 Continues continuous lateral bracing in addition to that specified in General Notes 2.
 Provide continuous lateral support at top chord by means of plywood sheathing or properly spaced Durlins.

DESCRIPTION: 24 TRUSS
 DATE: 19-APR-89
 SHI: 1 OF 1
 DRAWING NO: 53710
 CHECKED BY: SAUC
 DRAWN BY: AIRS
 ENG BY: SAUC

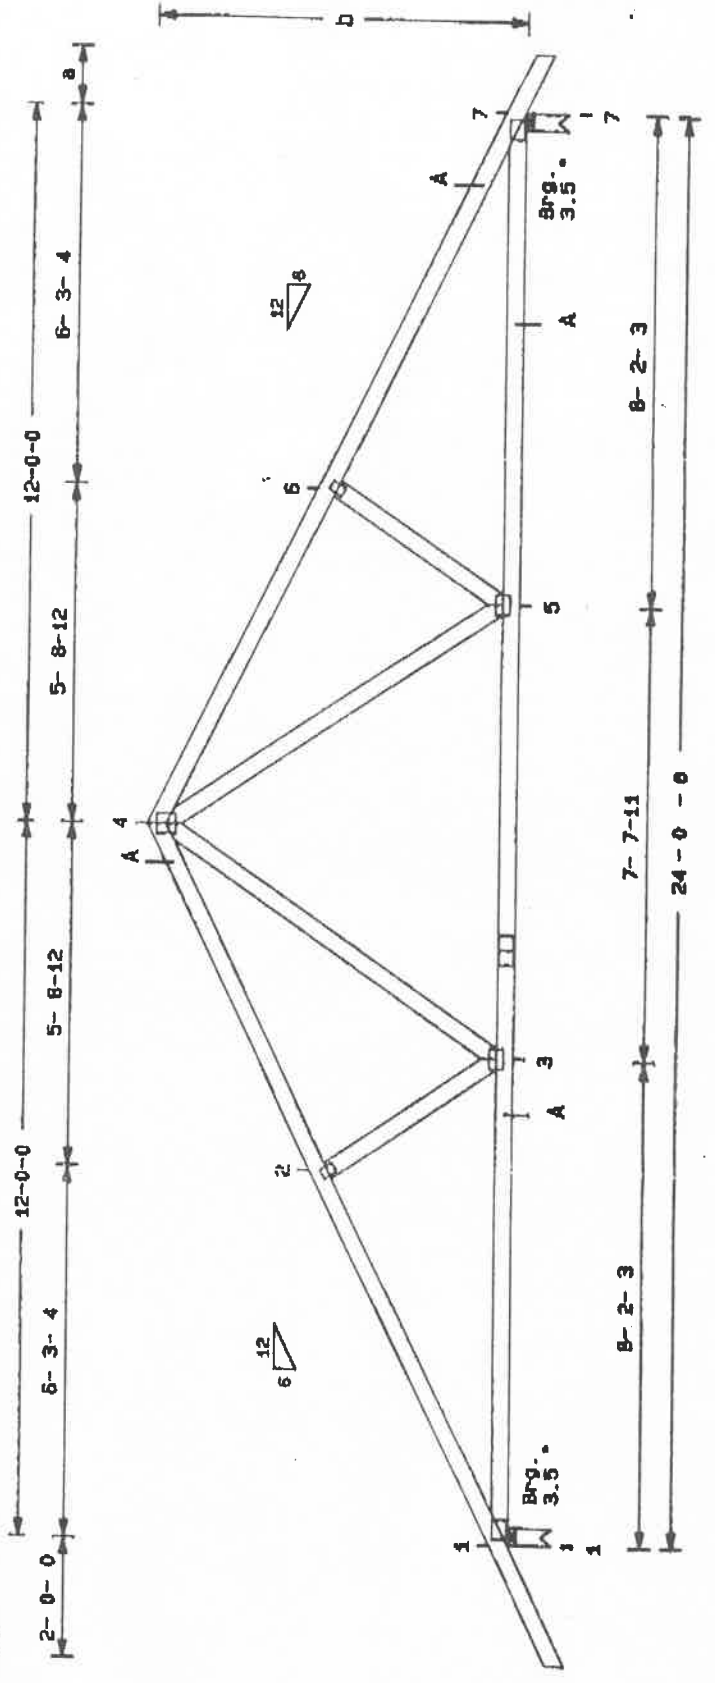

ATTENTION: Erector, Handing, Safety Precautions, Temporary or Permanent bracing are not the responsibility of the Truss Designer. Manufacturer's drawings for these trusses are designed as individual components. All lateral bracing in these drawings are intended to provide lateral restraint for individual truss members and are not intended to provide lateral restraint for the entire structure. The designer assumes responsibility of the design of bracing of the structure. Adequate bracing is always required. Competent professional should always be obtained relative to truss bracing and erection requirements.

Uniform Loading
 Top Live: 25.0 1) 3x4
 Top Dead: 10.0 2) 3x2
 Bot Live: 10.0 3) 3x4
 Bot Dead: 20.0 4) 4x4
