City of Napoleon  
P.O. Box 151  
Napoleon, Ohio 43545

Attn: John Helberg

Re: Floor Treatment  
Napoleon Fire Station

Dear John,

Per our conversation of 12-19-85, this letter serves as confirmation of my verbal quote as follows:

Sonothane Area 6,745 sq.ft.

Includes all labor and material to:

1. Solvent clean floor
2. Detergent wash
3. Etch surface with Muratic Acid
4. Double rinse
5. Apply two (2) coats colored Sonothane

\$7,987.00

Sonoplex Area 6,745 sq.ft.

1. Clean with Tri-Sodium Phosphate
2. Rinse as required
3. Etch with Muratic Acid
4. Double rinse
5. Apply two (2) coats colored Sonoplex

\$7,500.00

As I stated in my previous letter, I feel Sonoplex is more suited for this application. Regardless of which system is used, the oil separator would have to be pumped after the work is completed. I did not include a cost for this item because the City may own equipment to handle this.

Please contact me if you have any questions.

Sincerely,  
Cornerstone Construction, Inc.
