Gentlemen:

We have reviewed the submitted plans for the proposed automatic sprinkler fire extinguishing system at the above captioned location. Based on the submitted information, the plans appear to be consistent with minimum requirements of nationally recognized fire protection standards, with minor exceptions, if any, noted thereon.

If exceptions were noted on the plans, they are listed on an attachment to this letter. We suggest that consideration be given to these recommendations. While compliance with them is not mandatory, they can affect the fire insurance rating consideration allowed for the installation.

Upon completion of this installation, please notify this office and forward the completed "Contractor's Material and Test Certificate".

Any review, recommendation, or survey made by this office relates solely to fire insurance considerations; no representations or warranties of any kind are intended or made.

Yours very truly,

INSURANCE SERVICES OFFICE
