Pattison Sign Group recommends signage based on the Design Intent Drawings provided by Client. If your final approved design documents differ from the proposed scope of work, it is recommended that your General Contractor send the revised dimensions of your building facade for additional review. The size and placement of the ACMV letters (shown) is a vital part of our recommendation process to comply with General Motors design guidelines. All dimensions are in feet and inches unless otherwise noted. All dimensions are subject to change without notice. All dimensions are subject to change without notice. All dimensions are subject to change without notice.
