To: *Tom Zimmerman, Building and Zoning Inspector*
CC: *Jon Bisher, City Manager*
Scott Daman, Water Distribution Foreman
Ray Goodman, Streets and Sewer Foreman
From: *Jeffrey C. Marihugh, Operations Superintendent JEM*
Date: *March 12, 2009*
Subject: *Plans for Hong Kong Buffet, 1825 North Scott*

The Operations Department has reviewed the plans you provided on the above mentioned facility and have the following comments.

1. The facility shall be required to install a backflow device on the potable water line. A City of Napoleon Cross-Connection Control Questioner will need to be completed so the degree of hazard may be ascertained and the type of device required to be assigned.
2. A thermal expansion tank, which complies with current State of Ohio Plumbing Code and City of Napoleon Specifications, shall be installed on the plumbing.
3. No detailed plans were provided showing either the proposed water meter installation or the water meter sizing.
4. No plans were provided on the proposed backflow type, sizing and mounting location.
5. No detailed plans were submitted showing the thermal expansion installation.
6. While the drawings do show a 1,000-gallon grease trap, the proposed drawings show no baffling for the tank. Further, the City of Napoleon Water and Sewer Rules, Rule 19.2 (1) states that no discharge shall be more than 150° F. Neither the tank sizing nor the information on the proposed location provides documentation that the maximum or lower discharge temperature will be attained.

Should you have any questions on these comments, do not hesitate to contact me.
