Re: City of Napoleon  
Speedway Renovations

Mayor  
Donald M. Stange

Dear Mr. Thomas:

Upon review of the site plan submitted for the referenced project, we have determined that the existing catch basin on the north edge of your facility is inadequate to provide storm drainage to the site. We, therefore, will require that a storm sewer be extended from our existing manhole across Scott Street.

As the City intends to extend storm sewers along Railroad Street in the future, a twelve (12) inch sewer would be adequate to serve your facility, we request that your contractor install a twenty-one (21) inch storm sewer across Scott Street and the City will cover the incremental cost difference between the twelve (12) and twenty-one (21). Enclosed please find one (1) copy each of a drawing of the proposed improvements and a cost estimate for each pipe size. The City will reimburse your company up to \$2,458.00 for the cost of oversizing.

Also, the curbing across the frontage of Scott Street and Railroad Street is in need of replacement. The City will reimburse your company at a rate of \$15.00 per foot for this. Due to the extent of contamination found on the site and necessary excavation, we can see that the site plan previously submitted is essentially obsolete. Therefore, we request that a meeting time be established to discuss revisions and the potential curb replacement.

If you have any questions, please call me.

Yours truly,

Adam C. Hoff, P.E.  
City Engineer
