We have a garage inside deminsion 10' 6 " \times 18' 4". We want to remove existing garage door and replace with studed wall with windows of approximate dimension $3 \cdot 1/2$ " \times $3 \cdot 1/2$ ". There is an existing window with dimension 3'' 2" \times 2' 3" for a total square feet of area $16 \cdot 1/2$ sq. feet of window space. We want to put an entrance door on the north side of the garage. We want to raise the floor level approximately 4" by putting 2" \times 4" on 16" centers and then coverning with 3/4" \times 10" sheeting boards and then covering the sheeting boards with 5/8" underlaiment. The walls to be furred out and insulated covered with 1/2" plaster board and then panelled. Ceiling to be covered with 5/8" plaster board and then insulated. Ceiling tile will be put over the plaster board. Parking to be relocated to the south western portion of the lot. The existing drive to be removed except for approximately lo' section to be left for patio use.

John Hespe November 17, 1978
