# **SHEETROCK® FIRECODE® Core Gypsum Sheathing**

SHEETROCK® FIRECODE® Core gypsum sheathing is used in exterior steel or wood framed construction as a backup for siding, brick veneer, and other similar cladding where fire-resistance ratings are required.

## **Product Information:**

SHEETROCK® FIRECODE® Core gypsum sheathing has moisture-resistant paper on both sides, along with a moisture-resistant core that provides resistance to moisture and climatic changes.

The fire-resistant (Type X) panels score and snap easily for quick installation and are suitable for application under many exterior surfaces: masonry veneer; wood; mechanically-attached, drainable exterior finish systems; aluminum; steel and vinyl sidings; wood and mineral shingles; and stucco. It is suitable as 1 hr fire-rating applications for use in exterior steel- or wood-framed construction for single-family housing, apartments, motels, and light commercial buildings.

Product of USG Corp (United States Gypsum Corp)
