Dear Mr. Bechtol:

This coming fall and winter the City will be constructing a new eight (8) inch water main on Webster Street from West Main Street to West Washington Street. The purpose of the project is to replace the existing two (2) inch galvanized water main and provide a "looped" system along Webster Street.

City Manager
Marc S. Gerken, P.E.

The duplex you own at 616 Webster Street is currently fed by one (1) water service off of the old water main. The existing water meter is located within a meter pit outside of this residence. As the City continues to upgrade its distribution system, we are attempting to eliminate such external meters. The installation of the new water main presents an opportune time to install individual water services to each of the apartments and upgrade the meter assemblies. However, in doing so, there would be some expense to you, the property owner, as some external and/or internal plumbing revisions would be required.

Finance Director
Gregory J. Heath

Law Director
David M. Grahn

City Engineer
Adam C. Hoff, P.E.

I am requesting that a meeting time be established for the week of July 21st to discuss these options with you. If you have any questions, please call me.

Yours truly,

Adam C. Hoff, P.E.
City Engineer
