RE: Napoleon Elementary School: Water Meter/Setting

From: "John Grimes" <jgrimes@dimech.com>

05/09/14 09:32 AM

To: "Jeff Rathge" <jrathge@napoleonohio.com>

Jeff,

Eventually will need to review application process for purchase of meter (if fee involved) and how to arrange for getting meter spacer. I would not anticipate needing spacer until mid/late October 2014 but would like to take care of any application paperwork reasonably soon just to get done.

Thanks again, JJG

John,

Thank you for the call and the information you have sent. I will forward this on to Tom Zimmerman also. Tom is the City's building and Zoning. We have talked about this shortly already and have some basic information on the meter cost and things. We are both available to meet with you on site also, if the need arises.

If you have any thing else please get in contact with us.

Thanks Jeff

Subject: Napoleon Elementary School: Water Meter/Setting

Jeff,

Have attached City of Toledo standard water meter setting detail for your review/comment. This detail varies from construction document detail but provides better arrangement for future testing and maintenance. Not shown on detail is backflow preventer but a 4" RPZ backflow device is to be installed immediately downstream of meter setting.

Thanks again for your time this morning.

John Grimes
