N O T I C E

Hydro-Air Engineering, Incorporated is responsible for structural accuracy only, based on the design criteria shown on this drawing. Connector plate calculations are based on Hydro-Nail connector plate values and ratings. No responsibility is assumed for dimensional accuracy or aesthetic appearance. Plates shall be placed on both sides of truss joints, located as shown on the drawing and pressed in securely. Minimum lumber grades and plate sizes are specified. All trusses shall have wood members accurately cut, assembled in design configuration and fabricated in rigid fixtures with positive clamps so that all members have good bearing and all completed truss units are uniform. For other advice concerning the fabrication, quality control, storage, delivery, erection and bracing of trusses, it is recommended that the fabricator consult the Quality Control Manual for Light Metal Plate Connected Wood Trusses, Truss Plate Institute, Inc., Suite 205, 919 Eighteenth Street, N.W., Washington, D.C. 20006, 1973.
