Mayor Presentation of the Proposed 2014 Budget, as presented by Mayor Behm on December 2, 2013 at the Regular Meeting of City Council:

"For the 2014 year, the budget is a little over \$45 million; \$45,900,000. Compared to last year's budget \$49,989,000., the difference between the two has to do with the Scott Street Improvement which was about \$3,900,000. All in all, the budget is relatively similar to what it was for 2013.

[slide 2]City Income Taxes - \$3.3 million, the same budget amount from 2013 for 2014. The Property Assessment Lodge Tax is relatively the same at \$613,000 for this year. Really no difference, or no major difference in the budget. The debt notes and bonds and loans of \$2.5 million; last year that was \$1.8 million. Again, those funds will be used primarily for the Water Plant and that is just going to be issued as a note that will be discussed later on for this Council meeting.

[slide 3]Salaries and wages \$6.26 million, relatively again similar to what it was for 2013, we had \$6.27 million, so a light decrease in proposed salaries for the year of 2014. Fringe benefits, we are projecting a slightly higher amount, showing \$2.94 million whereas last year it was \$2.33 million, that's a difference of about \$154,000, most of that is from the increase in the health insurance cost.

Operating expenses \$3.2 million, which was relatively similar again compared to last year, most of the numbers you are not going to see much of a change on other than the capital improvements which in 2013 we showed \$10.9 million compared to 2014 of \$6.49 million which again is the Scott Street Improvement.

So overall the budget amounts are relatively similar compared to what we had from 2013. [slide 4] Expenses as a budget for the total budget based on Cost Center Function, we have \$4.6 million for the Safety, Fire, Health and Court; \$269,000 for Economic Development, that's down compared to the previous year's budget which was about \$941,000, most of that money comes from the Downtown Revitalization Improvement, since that will be going away also the CDBG funds are going to be 0 for next year as well, also that is why there is a big dropoff in those numbers. Safety, Fire, and Health last year's budget was \$4.29 million compared to the \$4.62 million for this year. The increase of about \$330,000, most of that is for the ambulance I believe that we will be acquiring, that took up a big portion of it and also an increase in the cost of the health insurance was another portion, and then I believe there was another \$50,000 some odd of capital improvements for the Police Station.

Parks & Recreation and Tourism is down from last year, that again because they were able to get that particular fund balanced with what is coming in from the levy. The Utilities Operations Capital amount of \$21.1 million is relatively similar, it's slightly down compared to 2013the debt payments principal and interest is up slightly as well, it's \$4.4 million makes up about 10% of the budget.

[slide 5]These right here are a list of the capital improvements for the year that's over \$80,000 apiece. We had the Southside Interceptor Sewer and I/I Removal Project \$900,000. The City's half share stranded costs of \$1.4 million on the A&PGS Project of \$700,000; annual rotary surfacing of street programs a little over \$560,000; Scott Street rebuild and improvement project \$517,000, new Water Treatment Plant access roadway of \$485,000; VanHyning, East Riverview and Front Street I/I Project of \$425,000; and then the Northcrest Circle improvements at \$385,000; facilities improvements and upgrades over \$340,000; Park Street storm sanitary sewer improvements of \$175,000; sanitary sewer emergency repairs \$100,000; new Water Treatment Plant design balance of \$80,000 carried over from last year and then other assorted projects that were less than \$80,000 apiece for over \$800,000.

Then major equipment listings over \$20,000 each; Fire has the AirPack replacement for \$221,000; replaced the ambulance unit for \$130,000; replaced Lifepack monitors for \$90,000; various computer software and hardware upgrades of over \$86,000; as well as Streets and various departments for the mini-excavator of \$80,000; Financial Suite software upgrade of \$68,000; rebuild mechanical screen number 1 of \$55,000; plant maintenance and electrical upgrades of \$40,000; as well as leak testing repair program \$39,000; rebuild of north mixer on digest route [spelling] \$22,000; then other equipment upgrades replacements for \$175,000.

That's the totaled planned budget for 2014 as we've all reviewed and discussed which we will also cover later on today and I'll just mention that one of the items that's in the budget for the parttime prosecutor, I plan on, as long as that's in there, I'll use my power to veto the budget. Hopefully I'll have enough Council people that will stand up and have that removed from the budget. *

City of Napoleon, Ohio 2014 Appropriation Budget

City Charter Article II, Section 2.13 Presented in accordance with by

Ronald A. Behm, Mayor

Amended - December 16, 2013

2014 APPROPRIATION BUDGET
